## PROJECTS

### Health Care Dashboard | Power BI, Data Visualization

Mar 2025 - Apr 2025

- Designed a responsive Power BI dashboard to analyze hospital waitlist data by case type, age group, and specialty over time
- Developed dynamic filters, time-based comparisons, and trend analysis to help healthcare providers monitor patient flow and reduce wait times
- Created key visualizations including waitlist distribution, wait time by patient specialties, and age-wise delay insights
- Implemented data preprocessing techniques to clean and structure healthcare dataset for optimal analysis and reporting

[GitHub Repository](#)

### Music Recommendation System | Python, Machine Learning, Streamlit

Jan 2025 - Feb 2025

- Built a Music Recommendation System using Streamlit with a content-based approach powered by K-Nearest Neighbors (KNN)
- Preprocessed a Kaggle dataset of 170K+ songs by scaling audio features like danceability, energy, and tempo
- Developed an interactive Streamlit app allowing users to set preferences via sliders and receive 10 similar song recommendations
- Integrated custom UI elements, saved models using joblib, and prepared the project for deployment on platforms like Streamlit Cloud

[GitHub Repository](#)

### Interactive Dashboards/Story on Data Science Jobs and Salaries | Tableau, Data Visualization

Oct 2024 - Nov 2024

- Developed interactive dashboards on trends in Data Science Jobs and Salaries for a particular year to analyze salaries, job roles and employment in data science industry
- Utilized data from Kaggle.com including information on job titles, salaries, company sizes, employment types, locations, and experience
- Performed data preprocessing and cleaning to handle missing or inconsistent salary and job title data and standardize salary values and adjust for inflation
- Applied data manipulation and transformation on Tableau and machine learning with predictive analytics to predict salary based on experience, job title and company size

## CERTIFICATES

### Supervised Machine Learning: Regression and Classification

Aug 2024

<https://coursera.org/verify/UUGMK2T3ZZVN>

### Data Structure and Algorithm: Self Paced(C++)

Jul 2024

<https://www.geeksforgeeks.org/certificate/7448af72917baa122c1291cec5fb672d>

### Data Science: Foundations using R (John Hopkins University)

Apr 2024

<https://coursera.org/verify/specialization/2365CM254ZWK>

### Excel Skills for Business (Macquarie University)

Mar 2024

<https://coursera.org/verify/specialization/23A4UCGJ6MPX>

## TECHNICAL SKILLS

### Languages:

Python, R programming, SQL, C++, Java, JavaScript

### Technologies/Frameworks:

Tableau, Microsoft Excel, Power BI, PyCharm, MySQL, HTML, React JS, Node JS, GitHub

### Skills:

Predictive Analytics, Data Visualization, Exploratory Data Analysis (EDA), Database Management System, Data Structures and Algorithm, Model optimization, Cross functional collaboration

## EDUCATION

### Lovely Professional University Punjab

2022 – 2026

Computer Science and Engineering

Jalandhar, Punjab

### Kendriya Vidyalaya Jammagar Gujarat

2021 – 2022

12th with PCM and Computer Science – Percentage: 89.5%

Jammagar, Gujarat

### Kendriya Vidyalaya Tambaram Chennai

2019 – 2020

10th with Science – Percentage: 95.4%

Chennai, Tamil Nadu
